

22 Patent families and hundreds of worldwide registrations

N. US9796988B2 — Processes for the production of microbial copolyesters from raw materials containing sucrose Bioon

N. US20160168319A1 — Process for recovering and purifying polyhydroxyalkanoates from a cell culture Bioon

N. US20190159997A1 — Compositions comprising bio-based polyesters and biocompatible inorganic compounds, and their uses in the cosmetic field Bioon

N. US7141400B2 — Production of biodegradable thermoplastic materials from organic waste Bioon

N. US20190224345A1 — Biocompatible polymeric nanoparticles containing functional metal nanostructures, preparation processes, and their uses in diagnostic and/or therapeutic fields Bioon

N. US7514525B2 — Recovery and purification of polyhydroxyalkanoates. Bion

N. US20200024172A1 — Bioremediation methods for water contaminated by hydrocarbons Bion

N. US20210113450A1 — Cosmetic compositions comprising biodegradable polyesters and oil phases Bion

N. US20200277490A1 — Composition based on at least one biodegradable polymer and its use as a binder for coating products Bion

N. US20210113436A1 — Powder compositions based on polyhydroxyalkanoates and their uses in dental prophylaxis Bion

N. US20210161948A1 — Polyhydroxyalkanoates for use in the prevention or treatment of overweight or obesity conditions or metabolic disorders related to such conditions

N. WO2020109841A1 — Flexible, biodegradable, and biocompatible supercapacitor Bion

N. WO2020049337A1 — Medical device for the regeneration of a damaged nerve Bion

N. WO2020049339A1 — Membrane for restoring the continuity of damaged biological tissues Bion

N. WO2020128584A1 — Polyhydroxyalkanoate (PHA) for use in the treatment and/or prevention of oral cavity diseases Bion

N. WO2020136420A1 — Piezoelectric device comprising a membrane made of polyhydroxyalkanoate fibers Bion

N. WO2020165820 — Slow-release fertilizer composition and method for its production Bion

N. WO2020188439A1 — Process for producing porous particles of a polyhydroxyalkanoate (PHA), porous particles obtainable from said process, and cosmetic compositions comprising the same Bioon

N. US20200375245A1 — Filter elements suitable for use in smoking articles and processes for their production Bioon

N. US20200375245A1 — Aerosol-generating articles suitable for use in aerosol-generating devices Bioon

N. WO2021024157 — Smoking device comprising at least one flavorable capsule Bioon

N. WO2019175725 — Polyhydroxyalkanoates for use in the prevention of colorectal cancer

BIO-ON's main asset is its know-how, which complements its intangible patent portfolio. Here is a selection of the international patents developed by Bio-on from **2008 to 2019**.
